Physics notes

The energy of a particle is $E = mc^2$ and a circle has area $A = \pi r^2$. Inline fractions like $\frac{a}{b} + \sqrt{x^2 + y^2}$ stay in the line.

Display math:

$$\int_0^\infty e^{-x^2}\,dx = \frac{\sqrt{\pi}}{2}$$

$$\sum_{n=1}^{N} n = \frac{N(N+1)}{2}$$

A price of $5 and $10 is not math. Plain **bold**, *italic* and `code` still work.

- first item with x_i^2
- second item
